Agrifirst Raschel Anti-Hail Net — high-strength HDPE protection from hailstorms. 90%+ light transmission. Protects orchards, vineyards, vegetables. Buy now.

4x better

crop protection from hail and birds

5x longer

life with 5-year UV warranty

3x easier

setup with flexible installation design

ABOUT

Raschel Knit Anti-Hail Net — Crop Insurance Against Hailstorm Damage

Agrifirst Anti-Hail Net (Raschel type) is a high-strength knitted HDPE net that protects fruit orchards, vineyards, and vegetable crops from devastating hailstorm damage. This raschel-knitted construction absorbs hail impact energy through its flexible mesh structure, preventing stone damage to fruits, leaves, and branches while allowing 90%+ of light and rainfall to pass through normally.

DESCRIPTION

Agrifirst Anti-Hail Net (Raschel) is a specialized high-strength hail protection netting manufactured using raschel knitting technology. This flexible, impact-absorbing mesh catches and deflects hailstones before they can damage crops — providing the most cost-effective insurance against India's increasingly frequent and severe hailstorms.

Key Benefits

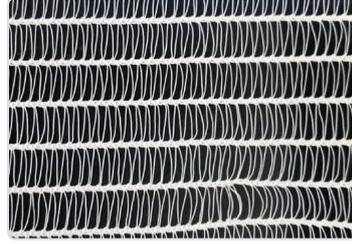

- **Complete Hail Protection** — Absorbs and dissipates hailstone energy across the flexible mesh, preventing crop damage
- **90%+ Light Transmission** — Minimal shade impact — crops grow normally under the net
- **Rain & Air Permeable** — Allows natural rainfall and wind to pass through freely
- **UV Stabilized** — 5–8 year outdoor life under Indian conditions
- **Tear-Resistant Edges** — Raschel knit construction prevents runs and unraveling even when cut
- **Multi-Purpose** — Also provides bird protection and light wind reduction

Technical Specifications

Construction	Raschel knitted HDPE monofilament
Mesh Size	4mm x 7mm / 5mm x 8mm
Weight	30–55 GSM
Color	White, transparent, green
UV Life	5–8 years
Available Widths	3m, 4m, 5m, 6m, 8m, 10m
Applications	Apple orchards, grape vineyards, pomegranate, citrus, vegetables, nurseries
