3x better

protection from sunburn and pests

2x higher

market value with export-quality fruit

4x healthier

fruit with stress resistance

ABOUT

Individual Fruit Shield Cover — Premium Fruit Protection from Pests, Birds & Weather

Agrifirst Fruit Shield Cover provides individual fruit-level protection for high-value crops like pomegranate, mango, guava, and apple. These protective sleeves prevent fruit damage from fruit fly, borers, birds, sunburn, and rain cracking — resulting in blemish-free, premium-grade fruits that command the highest market prices.

DESCRIPTION

Agrifirst Fruit Shield Cover is an individual fruit protection solution designed for India's premium fruit market. These protective covers/bags are placed over individual developing fruits to shield them from the most common causes of fruit damage and downgrading — fruit fly oviposition, borer attacks, bird pecking, sunburn, rain cracking, and cosmetic blemishes from wind-rub.

Key Benefits

- **Premium Grade Output** — Protected fruits are blemish-free, achieving Grade A classification and top market pricing
- **Chemical-Free Protection** — Physical barrier eliminates need for fruit-contact insecticide sprays during ripening
- **Fruit Fly Block** — Prevents fruit fly from laying eggs on fruit surface — the #1 cause of fruit rejection
- **Bird Exclusion** — Stops bird damage to ripening fruits
- **Sunburn Prevention** — Diffuses intense sunlight, preventing heat damage and sunscald
- **Rain Crack Reduction** — Protects from direct rain impact that causes fruit cracking in pomegranate and cherry

Technical Specifications

Material	Non-woven PP / micro-perforated PE (crop-specific)
Sizes	Small (10x15cm), Medium (15x20cm), Large (20x30cm)
Color	White (standard), brown, or green
