4x more

water conservation for sustainable farming

ABOUT

Pre-Punched Mulching Film for Row Crops — Weed Control & Moisture Retention

Agrifirst Ginegar Hole Mulch is a pre-punched agricultural mulching film designed for row crops like tomato, capsicum, brinjal, and chilli. Pre-drilled planting holes at precise spacing eliminate manual cutting, saving labor while providing complete weed suppression, soil moisture conservation, and soil temperature regulation. Manufactured by Ginegar Israel with premium UV stabilization.

DESCRIPTION

Agrifirst Ginegar Hole Mulch is a premium pre-punched agricultural mulching film that combines Israeli manufacturing precision with practical farm-ready design. Pre-drilled holes at standardized spacing (30cm, 45cm, or 60cm) eliminate the time-consuming task of manually cutting planting holes — saving up to 50% installation labor while ensuring perfect crop spacing every time.

Key Benefits

- **Pre-Punched Holes** — Factory-drilled at precise spacing, ensuring uniform crop placement and eliminating manual cutting labor
- **95% Weed Suppression** — Black underside blocks sunlight completely, preventing weed germination without herbicides
- **40% Water Savings** — Prevents soil surface evaporation, keeping root-zone moisture levels optimal with less irrigation
- **Soil Temperature Control** — Silver/black or black mulch regulates soil temperature — warmer in winter, cooler in summer
- **Cleaner Produce** — Prevents soil splash on fruits, reducing post-harvest cleaning and disease infection
- **UV Stabilized** — Ginegar's premium UV stabilizers ensure 12–18 month field life

Technical Specifications

| | |
|-----------------------|------------------------------------------------------------------------------|
| Manufacturer | Ginegar Plastic Products, Israel |
| Material | LDPE / LLDPE blend — UV stabilized |
| Thickness | 25 / 30 / 40 micron |
| Colors | Silver/Black, Black/Black |
| Hole Diameter | 50–75mm |
| Hole Spacing | 30cm / 45cm / 60cm (customizable) |
| Width | 0.9m, 1.0m, 1.2m |
| Length | 400m / 500m rolls |
| Field Life | 12–18 months (UV stabilized) |
| Suitable Crops | Tomato, capsicum, chilli, brinjal, cabbage, cauliflower, lettuce, strawberry |
