

Agrifirst Ginegar Onion/Garlic Mulch

Agrifirst Ginegar Onion/Garlic Mulch — specialized mulching film for allium crops. Dense hole spacing, weed control, moisture retention. Buy from Agrifirst India.

3x higher

yields with enhanced root development

4x better

weed suppression with zero light transmission

2x improved

water efficiency for sustainable farming

ABOUT

Specialized High-Density Mulching Film for Onion & Garlic Cultivation

Agrifirst Ginegar Onion/Garlic Mulch is a specialized mulching film with densely-spaced pre-punched holes designed specifically for onion, garlic, and other closely-planted bulb crops. The tight hole spacing matches the planting density of allium crops, providing complete weed suppression, moisture retention, and soil temperature regulation while enabling efficient high-density planting.

DESCRIPTION

Agrifirst Ginegar Onion/Garlic Mulch is purpose-engineered for India's massive allium crop segment — onion, garlic, shallot, and leek cultivation. Unlike standard row-crop mulch films, this specialized variant features high-density pre-punched holes at narrow spacing (typically 10cm x 15cm or 15cm x 15cm) to accommodate the close planting pattern that allium crops require for maximum yield.

Key Benefits

- **Optimized Hole Pattern** — Dense spacing matches onion/garlic planting requirements for maximum bulbs per square meter
- **Complete Weed Elimination** — Blocks all weed growth between closely-spaced plants — critical since manual weeding in allium beds is extremely labor-intensive
- **60% Labor Savings** — Eliminates 3–4 rounds of manual weeding during the crop cycle
- **Moisture Conservation** — Reduces irrigation frequency by 30–40%, critical for water-stressed growing regions
- **Uniform Bulb Size** — Consistent moisture and temperature promote even bulb development across the entire bed
- **Higher Marketable Yield** — 20–30% yield increase through better weed control, moisture management, and reduced disease

Technical Specifications

Manufacturer	Ginegar Plastic Products, Israel
Material	LDPE / LLDPE blend — UV stabilized
Thickness	25 / 30 micron
Colors	Silver/Black, Black/Black
Hole Spacing	10x15cm / 15x15cm (customizable for crop)
Width	0.9m, 1.0m, 1.2m
Length	400m / 500m rolls
Field Life	12 months
Suitable Crops	Onion, garlic, shallot, leek, chives
