

Agrifirst Right Pot Plus

Agrifirst Right Pot Plus — advanced air-pruning with root-directing ribs. Maximum root density for premium nurseries. Better than standard Right Pot.

3x stronger

root systems with white root enhancement

2x better

growth with integrated water storage

4x more

versatility for diverse cultivation needs

ABOUT

Agrifirst Right Pot Plus — Advanced Air-Pruning Container with Enhanced Root Training

Agrifirst Right Pot Plus is the premium version of our air-pruning container, featuring enhanced wall design with optimized perforation patterns and internal root-directing ribs. This advanced geometry maximizes air-pruning efficiency and directs root growth outward rather than downward — creating an even denser, more uniform root system for professional nurseries and high-value plant production.

DESCRIPTION

Agrifirst Right Pot Plus is the premium evolution of our proven Right Pot air-pruning technology. This advanced container adds internal root-directing ribs and optimized perforation geometry that actively guide root growth toward air-pruning points — resulting in even faster and more complete root branching than the standard Right Pot.

Plus Enhancements

- **Internal Root-Directing Ribs** — Guide circling roots outward toward air-pruning perforations instead of continuing to circle
- **Optimized Perforation Pattern** — Larger, more strategically placed openings for faster air-pruning response
- **Thicker Wall Construction** — Enhanced durability for professional nursery environments with heavy handling
- **Improved Drainage** — Enhanced base design for superior water drainage and aeration
- **All Standard Right Pot Benefits** — No root circling, dense root networks, faster growth, 100% transplant survival

Technical Specifications

Material	Premium UV-stabilized HDPE
Sizes	10L, 15L, 25L, 50L, 100L
Color	Black
UV Life	8–10 years
Applications	Professional nurseries, fruit tree production, high-value ornamentals, forestry programs
