3x stronger

resistance for outdoor durability

2x better

shading with 35% and 50% options

4x longer

life with 3-year UV stabilization

ABOUT

Mono x Mono Knitted Shade Net — Flexible, Lightweight & Cost-Effective Shade Solution

Agrifirst Mono x Mono Shade Net is a knitted HDPE shade net constructed using monofilament yarns in both directions. This lightweight, flexible construction provides excellent shade with superior air circulation — the most popular shade net type in India for agricultural, horticultural, and general outdoor applications.

DESCRIPTION

Agrifirst Mono x Mono Shade Net is India's most popular shade net variant — a knitted HDPE construction using monofilament (single-strand) yarns in both warp and weft. The knitted construction creates a flexible, lightweight fabric that allows excellent air circulation through the net while providing reliable shade protection from harsh sunlight.

Key Benefits

- **Excellent Airflow** — Knitted construction with round monofilaments allows maximum air passage through the fabric
- **Lightweight** — Easy to handle, install, and remove — ideal for seasonal applications
- **Flexible** — Conforms easily to different frame shapes — dome, flat roof, A-frame structures
- **Tear-Resistant Edges** — Knitted construction prevents unraveling even when cut
- **Cost-Effective** — Best shade-to-cost ratio for budget-conscious farmers
- **UV Stabilized** — 3–5 year outdoor life

Technical Specifications

Construction	Knitted — monofilament x monofilament (HDPE)
Shade Levels	35%, 50%, 75%, 90%
Colors	Green, Black, White
UV Life	3–5 years
Available Widths	2m, 3m, 4m, 5m
Available Lengths	50m, 100m rolls
Applications	Nethouse cladding, nursery shade, garden shade, livestock shade, construction site shade, parking
