

Anthurium

Anthurium thrives in controlled polyhouse environments. Exotic tropical flower with excellent shelf life and premium market value.

ABOUT

Exotic Anthurium for Premium Markets & Export

Anthurium is a high-value tropical flower with exceptional 20–30 day vase life. Agrifirst's humidity-controlled polyhouse creates the tropical microclimate anthurium needs for vibrant, long-lasting spathes.

DESCRIPTION

Anthurium is prized for its glossy, heart-shaped spathes in stunning reds, pinks, whites, and greens — and its remarkable 20–30 day vase life makes it a favorite for corporate décor, luxury events, and export. Agrifirst's polyhouse technology brings the tropical conditions anthurium needs right to your farm.

Why Grow Anthurium in Agrifirst Polyhouse?

- **Exceptional vase life** — 20–30 days, longest among commercial cut flowers
- **Premium pricing** — ₹15–80 per stem in domestic markets, higher for export
- **Year-round production** — Continuous flowering with proper climate management
- **Low maintenance** — Once established, anthurium requires minimal labor
- **Long plant life** — Plants produce for 5–7 years continuously

How Agrifirst Helps You Succeed

Agrifirst's anthurium polyhouse features 70–80% shade netting, fog/misting systems for 70–80% humidity, and temperature control at 20–28°C. Our specialized designs include elevated benches for proper drainage and air circulation — critical for anthurium crown health. With Agrifirst's tropical microclimate engineering, farmers produce export-quality anthuriums regardless of their external climate.

Expected earnings: ₹12–25 lakhs per acre annually with Agrifirst polyhouse anthurium cultivation.
