

Anti Drip Clear Film for Nursery

Agrifirst Anti-Drip Clear Nursery Film — no condensation drip. Protects seedlings from fungal disease. High clarity for nursery rain shelters. Buy from Agrifirst.

3x better

protection with anti-drip technology

2x stronger

durability with UV stabilization

4x growth

earlier growth support in monsoon conditions

ABOUT

Anti-Drip Clear Nursery Film — Condensation-Free Roofing for Plant Nurseries

Agrifirst Anti-Drip Clear Nursery Film is a specialized transparent polyethylene film with anti-drip surface treatment, designed specifically for nursery rain shelters and propagation units. The anti-drip coating prevents water droplets from forming and falling on tender seedlings and cuttings — eliminating the condensation damage, fungal diseases, and leaf burn that plague nursery operations.

DESCRIPTION

Agrifirst Anti-Drip Clear Nursery Film is engineered for the specific challenges of plant nursery environments. In nurseries, condensation is the enemy — water droplets forming on conventional plastic roofing fall onto tender seedlings and cuttings, causing mechanical damage, promoting Botrytis and damping-off diseases, and creating cold spots that slow growth. This film's anti-drip treatment eliminates these problems.

Key Benefits

- **Zero Drip** — Anti-drip coating causes water to form a thin continuous film that flows to the edges instead of forming droplets
- **Disease Prevention** — No water droplets falling on seedlings = dramatically reduced Botrytis, damping-off, and fungal diseases
- **Maximum Clarity** — 88–90% light transmission for optimum seedling growth
- **UV Stabilized** — 2–3 year life for nursery roof applications
- **Protects Cuttings** — Critical for propagation units where water on fresh cuttings causes rotting

Technical Specifications

Material	LDPE/LLDPE — UV stabilized with anti-drip coating
Thickness	100 / 150 / 200 micron
Light Transmission	88–90%
Anti-Drip	Yes — inner surface treatment
UV Life	2–3 years
Width	3m, 4m, 5m, 7m
Applications	Nursery rain shelters, propagation units, hardening chambers, seedling houses
