3x stronger

hold for secure crop cover placement

2x easier

installation with reinforced design

4x better

crop protection with stable support

ABOUT

Crop Cover Holder — Secure Fastening System for Agricultural Row Covers

Agrifirst Crop Cover Holder is a purpose-designed fastening system for securing non-woven crop covers, mulch films, and protective fabrics over crops and along low tunnels. These clips/holders grip firmly without puncturing the cover material, enabling easy installation, removal, and reuse — saving labor and extending cover material life.

DESCRIPTION

Agrifirst Crop Cover Holder is a practical fastening accessory for securing crop cover fabrics, non-woven shields, and low tunnel films in place. These clips grip the cover material firmly without puncturing or damaging it — unlike traditional methods of using stones, soil, or staples that tear the fabric and create entry points for pests and water.

Key Benefits

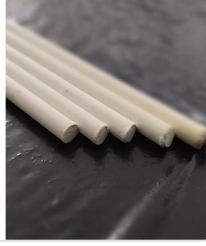

- **No Puncturing** — Clips grip without piercing, extending cover material life by 2–3x
- **Quick Installation** — Snap on/off in seconds — no tools required
- **Fully Reusable** — UV-stabilized plastic clips last multiple seasons
- **Secure Hold** — Firm grip prevents wind displacement
- **Compatible** — Works with crop shields, mulch films, insect nets, and tunnel covers

Technical Specifications

Material	UV-stabilized plastic
Fits	Standard 8mm–12mm support sticks/pipes
UV Life	5+ years
Packaging	100 / 250 / 500 per pack
