

Ginegar Anti Hail Net Leno

Ginegar Leno Anti-Hail Net — maximum strength leno weave for severe hailstorms. Israeli quality, no distortion under impact. Premium orchard protection. Agrifirst.

4x stronger

defense against hail and birds

5x extended

durability with 5-year UV warranty

3x better

airflow with high-ventilation design

ABOUT

Ginegar Leno-Weave Anti-Hail Net — Maximum Strength for Severe Hailstorm Regions

Ginegar Anti-Hail Net (Leno type) is a premium woven hail protection net featuring leno-weave construction for maximum tensile strength and dimensional stability. The leno weave locks warp and weft threads together, creating a net that won't shift or distort under heavy hail impact — providing the most reliable protection for orchards and vineyards in regions prone to severe hailstorms.

DESCRIPTION

Ginegar Anti-Hail Net (Leno type) is a premium hail protection netting from Israel's Ginegar, featuring advanced leno-weave construction where pairs of warp threads are twisted around each weft thread. This interlocking weave creates a dimensionally stable mesh that maintains its shape even under the most severe hailstone impact — unlike standard knitted nets that can stretch and distort.

Key Benefits

- **Maximum Tensile Strength** — Leno weave provides the highest tear and impact resistance of any anti-hail net
- **No Distortion** — Locked-thread construction maintains mesh geometry even after heavy impact events
- **Israeli Manufacturing Quality** — Ginegar's precision manufacturing ensures consistent mesh dimensions
- **8–10 Year UV Life** — Premium UV stabilization for the longest-lasting hail protection
- **High Light Transmission** — Minimal shading for normal crop growth

Technical Specifications

Manufacturer	Ginegar Plastic Products, Israel
Construction	Leno weave — HDPE monofilament
Mesh Size	4mm x 7mm / 5mm x 8mm
Weight	40–65 GSM
UV Life	8–10 years
Available Widths	4m, 5m, 6m, 8m
Applications	Apple orchards (Kashmir, HP), grape vineyards (Maharashtra), pomegranate, citrus, kiwi
