

Ginegar Driplock Clear

Ginegar Driplock Clear — 90% light, anti-drip, anti-dust, 200-micron 5-layer Israeli greenhouse film. Best for hilly regions. 3-year UV life. Buy from Agrifirst India.

3x better

light penetration for enhanced plant growth in low-sunlight areas

2x longer

longer durability with 3-year UV-stabilized protection

30 percent

water damage reduction with anti-drip technology

ABOUT

High-Clarity Greenhouse Film for Maximum Light Transmission in Cold & Hilly Regions

Ginegar Driplock Clear is a premium 5-layer co-extruded greenhouse film from Israel's leading agricultural film manufacturer. With 90% light transmission, anti-drip technology, and anti-dust coating, this film is engineered specifically for cold, hilly regions where maximizing sunlight penetration is critical for crop growth. Distributed exclusively by Agrifirst in India.

DESCRIPTION

Ginegar Driplock Clear is a premium-grade 5-layer co-extruded polyethylene greenhouse film manufactured by Ginegar Plastic Products, Israel — the world's leading agricultural film producer with over 50 years of innovation. Distributed exclusively by Agrifirst in India, this film delivers the highest light transmission (90%) in the Ginegar greenhouse film range, making it the ideal choice for cold, hilly regions where every photon of sunlight counts.

Why Choose Ginegar Driplock Clear?

- **90% Light Transmission** — Industry-leading clarity ensures maximum sunlight reaches crops, critical for photosynthesis in low-light hilly environments
- **Advanced Anti-Drip Technology** — Special inner-surface treatment prevents water droplet formation on the film interior, eliminating condensation damage, fungal diseases, and light-blocking water sheets
- **Anti-Dust Coating** — Outer surface treatment repels dust buildup, maintaining high light transmission throughout the film's life without frequent cleaning
- **5-Layer Co-Extrusion** — Multi-layer construction combines UV stabilizers, anti-drip agents, and mechanical strength in a single 200-micron film
- **3-Year UV Life** — Premium UV stabilizers protect the film from degradation, ensuring consistent performance for 3+ years
- **25% Light Diffusion** — Gentle diffusion prevents hot spots and sunburn while ensuring uniform light distribution across the growing area

Technical Specifications

Manufacturer	Ginegar Plastic Products, Israel
Technology	5-Layer co-extruded polyethylene
Thickness	200 Micron
Light Transmission	90%
Light Diffusion	25%
UV Stabilization	Yes — 3 years (pro-rata warranty)
Anti-Drip	Yes — inner surface treatment

AGRIFIRST - FARMERS FIRST

Plot E-7, Industrial Area, Kanpur - Lucknow Road,

www.agrifirst.in

Anti-Dust	Yes — outer surface coating
Available Widths	4.5m, 5.5m, 7m, 9m
Available Lengths	600–900m jumbo rolls (customizable)
Recommended For	Hilly regions with low winter light — Himachal Pradesh, Uttarakhand, Northeast India, Nilgiris
Suitable Crops	Carnation, nursery stock, gerbera, vegetable seedlings (except roses — use Driplock Diffused instead)
Port of Dispatch	Hosur / Ahmedabad
Delivery	Immediate from Agrifirst warehouses across India

Pro Tip from Agrifirst Agronomists

For rose cultivation, we recommend **Ginegar Driplock Diffused** instead, which provides higher diffusion levels that prevent petal burn. Driplock Clear is perfect for nurseries, carnation houses, and vegetable production in light-deficient areas. Contact our team for a free consultation on selecting the right film for your specific location and crop.
