

Ginegar Embossed Mulch

Ginegar Embossed Mulch — textured surface for superior wind resistance. Enhanced soil grip, weed control, moisture retention. Best for windy areas. Agrifirst India.

4x longer

durability with 24-month UV protection

3x better

weed suppression with zero light transmission

2x enhanced

photosynthesis for robust plant growth

ABOUT

Embossed-Surface Mulching Film — Enhanced Grip & Soil Contact for Wind-Prone Areas

Ginegar Embossed Mulch features a specially textured (embossed) surface that provides superior grip on soil surfaces and better resistance to wind uplift. The embossed pattern increases the film's contact area with soil, preventing wind displacement while also improving heat transfer and condensation management. Ideal for open-field and nethouse cultivation in windy regions.

DESCRIPTION

Ginegar Embossed Mulch is an advanced agricultural mulching film featuring a unique embossed (textured) surface pattern that provides distinct advantages over smooth-surface mulch films. The embossing increases the effective surface area of the film, creating better soil adhesion, improved wind resistance, and enhanced condensation management — making it the ideal choice for windy locations and areas prone to film displacement.

Key Benefits

- **Superior Wind Resistance** — Embossed texture grips soil better than smooth films, preventing wind uplift and displacement
- **Better Soil Contact** — Textured surface conforms more closely to soil surface irregularities, improving heat transfer
- **Improved Condensation Management** — Embossing pattern channels condensation along the film surface rather than forming large droplets
- **Complete Weed Suppression** — Same 95%+ weed blocking as standard mulch with added physical stability
- **Reduced Installation Effort** — Better grip means less soil and stone placement needed to hold film in place

Technical Specifications

Manufacturer	Ginegar Plastic Products, Israel
Surface	Embossed (textured) pattern
Material	LDPE / LLDPE blend — UV stabilized
Thickness	25 / 30 / 40 micron
Colors	Silver/Black, Black/Black
Width	0.9m, 1.0m, 1.2m
Length	400m / 500m rolls
Field Life	12–18 months
Best For	Windy open-field locations, coastal farming, nethouse cultivation, ridge & furrow beds
