3x longer

durability with 3-year UV stabilization

2x faster

repairs for greenhouse polyfilm

4x better

protection with reliable patching

ABOUT

Ginegar Film Repair Tape — Israeli-Made UV-Stable Tape for Greenhouse Film Repairs

Ginegar Film Repair Tape is a premium UV-stabilized adhesive tape from Israel, specifically formulated for patching tears, holes, and damage in greenhouse polyethylene films. This tape bonds firmly to PE film surfaces, maintains adhesion through temperature cycles, and resists UV degradation — extending the life of your expensive greenhouse film instead of requiring full replacement.

DESCRIPTION

Ginegar Film Repair Tape is a premium-quality UV-stabilized repair tape manufactured by Ginegar Israel specifically for greenhouse film applications. When greenhouse film gets damaged — from wind, hail, equipment contact, or accidental puncture — this tape provides an immediate, long-lasting repair that maintains the film's protective properties without expensive full-panel replacement.

Key Features

- **UV Stabilized** — Will not yellow, crack, or lose adhesion from sun exposure
- **PE Film Adhesion** — Formulated specifically to bond to polyethylene greenhouse film surfaces
- **Temperature Resistant** — Maintains bond through day/night temperature cycles (-5°C to +60°C)
- **Waterproof** — Seals against rain penetration at the repair site
- **Transparent** — Minimal light loss at repair locations

Technical Specifications

Manufacturer	Ginegar Plastic Products, Israel
Material	UV-stabilized PE with pressure-sensitive adhesive
Width	50mm / 75mm / 100mm
Roll Length	25m / 50m
UV Life	2–3 years (matching film life)
Application	Patch tears, holes, and seams in greenhouse PE films
