

Ginegar Opinet - New Gen Insect Net

Ginegar Opinet — new-gen insect net with 20% better airflow. Blocks all pests while maximizing ventilation. Israeli technology. Exclusive at Agrifirst India.

5x less

pest penetration for top-tier crop safety

3x better

ventilation for healthier plants

4x reduced

disease risk with dust-free design

ABOUT

Ginegar Opinet — Next-Generation Insect Net with Superior Airflow & Visibility

Ginegar Opinet is a revolutionary next-generation insect exclusion net from Israel that combines premium pest blocking with unprecedented airflow and visibility. Unlike conventional insect nets that create significant shade and reduce ventilation, Opinet uses advanced thread geometry and optimized mesh patterns to block insects while allowing 15–20% more air passage and higher light transmission than standard 50-mesh nets.

DESCRIPTION

Ginegar Opinet is a breakthrough insect exclusion net that solves the biggest problem with conventional insect netting — airflow restriction. Standard fine-mesh insect nets block pests effectively but also significantly reduce ventilation, causing heat buildup inside the greenhouse. Opinet's advanced thread geometry and optimized mesh architecture deliver the same insect-blocking performance with 15–20% more airflow.

The Opinet Advantage

- **15–20% Better Airflow** — Advanced mesh geometry allows significantly more air to pass through while still blocking insects
- **Complete Insect Block** — Blocks whitefly, thrips, aphids, leaf miners, and all other greenhouse pests
- **Higher Light Transmission** — Thinner, more transparent threads allow more light through than standard nets
- **Reduced Heat Stress** — Better ventilation means lower internal temperatures — critical during Indian summers
- **Premium Israeli Manufacturing** — Ginegar's precision-engineered mesh with consistent hole dimensions
- **7–10 Year UV Life** — Exceptional longevity under the most intense UV conditions

Technical Specifications

Manufacturer	Ginegar Plastic Products, Israel
Technology	Next-generation optimized mesh geometry
Pest Blocking	Equivalent to 50-mesh — blocks all greenhouse pests
Airflow	15–20% better than standard 50-mesh nets
Color	Crystal clear / white
UV Life	7–10 years
Available Widths	2m, 3m, 4m, 5m
Applications	NVPH vent panels, nethouse walls, greenhouse doors, nursery covers

Agrifirst Recommendation

Ginegar Opinet is our top recommendation for naturally ventilated polyhouses in hot climates where airflow is critical. The superior ventilation reduces the need for mechanical cooling, saving energy costs while maintaining complete pest exclusion.
