

Gladiolus

Gladiolus cultivation in nethouse provides pest protection. Popular cut flower with vibrant colors for commercial floriculture.

ABOUT

Vibrant Gladiolus Spikes for Cut Flower Markets

Gladiolus produces tall, striking flower spikes in brilliant colors, making it a top choice for cut flower markets and event decoration. Agrifirst nethouse protection ensures straight, damage-free spikes.

DESCRIPTION

Gladiolus is one of the most popular cut flowers in India, prized for its tall, colorful spikes that add drama to flower arrangements and event decorations. Under Agrifirst's nethouse protection, gladiolus spikes grow taller, straighter, and with more florets open — delivering better market appeal and higher prices.

Why Grow Gladiolus Under Agrifirst Protection?

- **Strong market demand** — Top 5 cut flower in Indian markets
- **Quick returns** — 90–100 days from corm planting to harvest
- **Weather protection** — Nethouse prevents wind damage and rain spotting on spikes
- **Straighter spikes** — Protected conditions produce the upright, straight spikes markets prefer
- **Festival timing** — Multiple plantings timed for peak demand periods

How Agrifirst Helps You Succeed

Agrifirst's nethouse structures protect gladiolus from wind lodging, rain damage, and thrips — the primary quality-reducing factors. Our structures maintain optimal light levels for vibrant flower colors while protecting delicate petals. With Agrifirst's support in planting schedule planning, farmers time their gladiolus crops to coincide with peak market demand for maximum profitability.

Expected earnings: ₹6–12 lakhs per acre annually with Agrifirst nethouse gladiolus cultivation.
