

Lemongrass

Lemongrass thrives in nethouse conditions. Aromatic herb with high demand for tea, essential oil, and culinary applications.

ABOUT

Aromatic Lemongrass for Tea, Essential Oil & Culinary Markets

Lemongrass is a versatile, low-maintenance herb with strong demand for lemongrass tea, essential oil (citral), and Asian cooking. Agrifirst nethouse solutions boost oil content and enable cleaner harvests.

DESCRIPTION

Lemongrass is a highly versatile crop with multiple revenue streams — fresh culinary use, herbal tea (India's wellness tea market is booming), essential oil extraction (citral), and industrial applications. Under Agrifirst's nethouse conditions, lemongrass produces higher essential oil content and cleaner harvests for premium markets.

Why Grow Lemongrass Under Agrifirst Protection?

- **Multiple markets** — Fresh herb, tea, essential oil, and citronella applications
- **Wellness boom** — Lemongrass tea market growing 30%+ annually in India
- **Low maintenance** — Hardy crop requiring minimal inputs and labor
- **Regular harvests** — Cut every 45–60 days, 5–6 times per year
- **Higher oil content** — Protected conditions increase citral content in leaves

How Agrifirst Helps You Succeed

Agrifirst's nethouse structures provide lemongrass with optimal growing conditions — warm temperatures, good light, and protection from excessive rain that leaches essential oils from leaves. Our efficient drip irrigation maximizes leaf production while Agrifirst's market connections help farmers sell to tea companies, essential oil distillers, and Asian food restaurants at premium prices.

Expected earnings: 74–10 lakhs per acre annually with Agrifirst nethouse lemongrass cultivation.
