

Lily

Lily cultivation in polyhouse conditions produces premium quality flowers. High-value ornamental crop with growing demand in India.

ABOUT

Premium Lily Flowers for Gifting & Décor Markets

Lily is a premium flower commanding ₹20–100 per stem in Indian markets. Agrifirst polyhouse provides the controlled environment needed for lily bulb forcing and year-round bloom production.

DESCRIPTION

Lily is one of the most elegant and high-value cut flowers, with growing demand in India's gifting, event decoration, and premium retail segments. Asiatic and Oriental lilies fetch premium prices and are increasingly popular in metro city flower markets. Agrifirst's polyhouse conditions are essential for consistent lily production.

Why Grow Lily in Agrifirst Polyhouse?

- **Premium pricing** — ₹20–100 per stem depending on variety and season
- **Growing demand** — Increasingly popular for events, gifting, and premium retail
- **Controlled growing** — Lilies require precise temperature management for bulb forcing
- **Quick turnaround** — 90–120 days from bulb planting to flowering
- **Multiple cycles** — 2–3 production cycles per year possible

How Agrifirst Helps You Succeed

Agrifirst's climate-controlled polyhouse provides the precise temperature sequences that lily bulbs need for proper vernalization and stem elongation. Our cooling systems ensure the 12–18°C initial growing phase, followed by warm conditions (20–25°C) for flowering. With Agrifirst's automation and expert guidance, farmers can successfully produce premium lilies that command top market prices.

Expected earnings: ₹10–20 lakhs per acre annually with Agrifirst polyhouse lily cultivation.
