

Mint

Mint grows vigorously in protected cultivation. Aromatic herb with year-round demand for culinary, medicinal, and essential oil uses.

ABOUT

Year-Round Fresh Mint Supply with Protected Cultivation

Mint is a high-demand herb used in beverages, cooking, pharmaceuticals, and personal care. Agrifirst nethouse solutions produce clean, aromatic mint leaves with year-round harvesting capability.

DESCRIPTION

Mint is one of the world's most versatile herbs — used in beverages, cooking, confectionery, pharmaceuticals, cosmetics, and essential oil production. India is the world's largest mint oil producer, and demand for fresh mint continues to grow rapidly with the expansion of food service and beverage industries.

Why Grow Mint Under Agrifirst Protection?

- **Massive market** — India produces 80% of world's mint oil, with growing fresh herb demand
- **Year-round harvest** — 8–10 cuttings per year under protected conditions
- **Clean, premium leaves** — No dust, mud splash, or pest damage
- **Multiple products** — Fresh leaves, dried mint, mint oil, and mint water
- **Low maintenance** — Mint grows vigorously with minimal input once established

How Agrifirst Helps You Succeed

Agrifirst's nethouse structures provide the partial shade and moisture retention mint loves while keeping leaves clean and pest-free. Our efficient micro-irrigation systems maintain the consistent moisture mint needs for vigorous growth. With Agrifirst's protection, farmers produce premium quality fresh mint leaves that meet the hygiene standards of modern retail, restaurants, and food processing companies.

Expected earnings: ₹4–10 lakhs per acre annually with Agrifirst nethouse mint cultivation.
