

## Radish

Radish is a fast-growing crop ideal for nethouse cultivation. Quick harvest cycles of 25-30 days for continuous production.

### ABOUT

#### Quick-Harvest Radish with Clean, Uniform Roots

Radish is one of the fastest crops to harvest — ready in just 25–30 days. Under Agrifirst nethouse conditions, radish produces clean, smooth, straight roots without pest damage, enabling 10–12 harvests per year.

### DESCRIPTION

**Radish** offers the fastest turnaround of any vegetable crop — from seed to harvest in just 25–30 days. Under Agrifirst's nethouse protection, radish roots grow straight, smooth, and clean without the surface damage from soil-dwelling pests. This rapid cycle makes radish an excellent filler crop between longer-duration polyhouse crops, maximizing per-acre income.

#### Why Grow Radish Under Agrifirst Protection?

- **Ultra-fast harvest** — 25–30 days per cycle, up to 12 cycles per year
- **Clean, smooth roots** — No pest scars or soil-borne blemishes
- **Consistent quality** — Uniform size and shape for market appeal
- **Excellent rotation crop** — Perfect for filling gaps between main crop cycles
- **Steady demand** — Daily consumption vegetable with consistent market

#### How Agrifirst Helps You Succeed

Agrifirst's nethouse structures provide the ideal protected environment for radish — keeping out flea beetles and root maggots while maintaining the cool, moist conditions radish prefers. Our efficient micro-sprinkler and drip systems ensure even moisture distribution for uniform root development. Farmers using Agrifirst solutions maximize their land utilization by incorporating radish as a profitable rotation crop.

**Expected earnings:** ₹4–8 lakhs per acre annually with Agrifirst nethouse radish cultivation.
