

Thyme

Thyme grows well in controlled polyhouse conditions. Aromatic culinary herb with medicinal properties and premium market demand.

ABOUT

Premium Thyme for India's Growing Gourmet Herb Market

Thyme is a high-value culinary and medicinal herb gaining popularity in India. Agrifirst polyhouse conditions produce aromatic, oil-rich thyme for restaurants, retail, and essential oil markets.

DESCRIPTION

Thyme is a premium Mediterranean herb whose demand in India is growing with the expansion of continental and international cuisines. Both fresh thyme sprigs and dried thyme command excellent prices, while thyme essential oil (thymol) has significant pharmaceutical and personal care applications.

Why Grow Thyme in Agrifirst Polyhouse?

- **High value** — Fresh thyme fetches ₹400–1000/kg in premium markets
- **Medicinal value** — Thymol has proven antibacterial and antiseptic properties
- **Low maintenance** — Hardy perennial requiring minimal inputs once established
- **Multiple harvests** — Continuous cutting for 3–4 years per planting
- **Supply gap** — India imports most thyme, creating opportunity for domestic growers

How Agrifirst Helps You Succeed

Agrifirst's polyhouse provides the warm, dry conditions thyme needs to produce maximum aromatic oils. Our well-ventilated designs prevent the humidity-related fungal issues that affect thyme in Indian climates. With Agrifirst's raised bed and drip irrigation systems, farmers create the well-drained growing conditions this Mediterranean herb requires for optimum production.

Expected earnings: ₹6–15 lakhs per acre annually with Agrifirst polyhouse thyme cultivation.
