

## Zig-zag wire with PVC Coated Rust Free

Agrifirst PVC-Coated Zigzag Wire — rust-free spring wire for greenhouse film locking. No staining, corrosion-proof. Pairs with aluminium profiles. Buy now.

**3x stronger**

grip against wind pressure

**2x reduced**

heat transfer for profile safety

**4x longer**

life with rust-free PVC coating

### ABOUT

#### PVC-Coated Zigzag Wire — Rust-Free Film Locking Spring for Greenhouse Profiles

Agrifirst PVC-Coated Zigzag Wire is a spring-steel wire with protective PVC coating that locks greenhouse films securely into aluminium profiles. The PVC coating prevents rust staining on greenhouse films and eliminates corrosion in humid environments — ensuring clean, long-lasting film attachment.

### DESCRIPTION

**Agrifirst PVC-Coated Zigzag Wire** is the essential companion to our aluminium film-locking profiles. This spring-steel wire with protective PVC coating is pushed into the aluminium channel over the greenhouse film, locking the film firmly in place. The PVC coating serves a dual purpose — preventing rust staining on expensive greenhouse films and eliminating corrosion in the perpetually humid greenhouse environment.

### Key Features

- **PVC Coated** — No rust, no film staining, no corrosion — even in high-humidity environments
- **Spring Steel Core** — Maintains firm locking pressure throughout its life
- **Easy Installation** — Flexible enough to push in by hand or with a simple tool
- **Reusable** — Can be removed and re-installed multiple times during film changes
- **Universal Fit** — Compatible with all Agrifirst aluminium profiles

### Technical Specifications

Core Material	Spring steel wire
Coating	PVC (polyvinyl chloride) — rust-proof
Profile	Zigzag / wobble pattern for spring grip
Length	Rolls — 30m / 50m / 100m
Color	White / Silver
Compatible	All Agrifirst aluminium profiles (0.8mm & 0.9mm)
